In addition, we are highly ranked for many local city and state terms such as [South Carolina SEO](#), [Charleston SEO](#), [Greenville SEO](#), [Columbia SEO](#) and [Myrtle Beach SEO](#).

Can we do SEO at a high level? **Absolutely.**

The question is not “can we?,” but **“How can we help your business?”**

What is Organic SEO?

Organic SEO describes the work done to boost a website’s position within the natural, organic search engine results. Organic SEO is NOT a one time exercise. Miscellaneous Fees (these are not common)

Search engines evolve.

Your competition does too.

Throughout the life of your campaign, there may be additional charges needed to keep your website up to date. Examples of this are a recommended **annual website copy refresh** by the PalmettoSoft copywriter and a **citation building campaign** (third party software is used). Websites who periodically refresh their content (and make proactive adjustments/upgrades) get “ranking favoritism” over ones that don’t. PalmettoSoft asks that the customer pay for situations like these. Another example could be **adding a video section** to your website... or **expanding a page’s content to better support a more competitive/high search demand keyword.** *While most of the SEO work PalmettoSoft does is considered “routine,” and is included with our monthly service, sometimes extra work needs to be done for an ever changing Internet landscape.*

Website Maintenance is a Separate Service

Websites need to be changed/modified on a regular basis. The information in this agreement focuses primarily on search engine optimization work and this is also one of the core services of PalmettoSoft.

In the event the customer wants to, for example, add a new web page, adjust their logo, add images, change copy, etc... This type of work needs to be done by an

experienced developer and we **may ask the client to pay extra for this work** for a marginal fee.

If the customer has a developer and/or wants to pay their developer to do the work- PalmettoSoft will consult free of charge as part of your service.

Campaign Goals

- Establish 1st Page Keyword Ranking
 - Within 90 days (or less) after routine work starts, **begin** to establish 1st page Google rankings
 - Maintain those rankings
- Website Performance
 - Increase organic traffic
 - Improve overall website performance via Google Analytics analysis and customer input
 - Lower website bounce rates
 - eCommerce: Raise sales revenue
- Increase customer base
 - Create new customers
 - Enhance organization branding and credibility

Prorated SEO Setup Fees

Typically, SEO campaigns do not begin exactly at the beginning of each calendar month and PalmettoSoft does NOT prorate this work. For example, if your campaign began on the 10th, we would have thirty days of normally scheduled SEO Setup work to do in a compressed 20 day period. Please notice the Setup and Launch phases of your SEO schedule in the proposal. All work we do is explained in great detail.
